### SEED-LIST 2016-2017

Dear Friends,

I am sending you my new seed-list. All seeds are high quality and are harvest from plants true to name. A part of seeds was collected in its natural habitats by me or my botanist-friends, second part of plants was collected in my garden, but **all** from plants with natural origin.

Unless otherwise indicated, packets contain 20 seeds. Orders will be processed in the order of arrival. Please send me the money (EUR or equivalent in USD, GBP) **after receiving** my shipment. Please **add** EUR 1.00, bigger order 2.00, overseas EUR 2.00, bigger order 4.00 to cover postage and handling. If you need Phytosanitary Certificate (especially overseas friends – Czech Republic is in EU now), write me and add EUR 5.00.

**With the respect to mail losses last season I request the money to be sent ONLY with these methods:**

**1/ bank to bank transfer to my friend Mr. Stanislav Holoubek, Sparkasse Passau, Bankleitzahl 740 500 00, Kontonummer 694240**

**IBAN DE46 7405 0000 0000 6942 40, SWIFT-BIC: BYLADEM1PAS**

**2/ They payment can be done through Paypal with usage my e-mail address (vpilous@seznam.cz), but there is extra 4, 5% to be charged for the fees.**

**3/ cash – only minor payments up to 25 EUR exclusively to Mr. Stanislav Holoubek in Germany (Steinbachstr. 56, 94036 Passau, Germany)**

**4/ cheque – directly to me. Please add 3 EUR for bank's provision.**

**5/ The payment terms is 30 days, please.**

Because of technical problems I am not able to arrange orders smaller than EUR 10.00.

Important information: I have got a special request to you, because I am permanently very busy. That is why I will not send bills for seeds and I would like to ask you to count the money by yourself (plus postage and P.C. – see above) after parcel receipt and to send to me then. Please, do not send any money in advance (together with order).

And one more problem. Please for indulgence: last years I had just few packets of some rare plants (for example some Juno-Irises, Paeonias etc.). But there were tens of orders (some customers ordered even 5

packets for one person). Some customers who did not get it were displeased. This year the situation is quite similar with some species. I kindly ask you not to order more packets of one species for one person which are marked "limited stock". Thank you.
