

Alpine Garden Club of British Columbia

Seed Exchange 2012

We are very grateful to all those members who have made our Seed Exchange possible through donating seeds, and to those living locally who volunteer so much time and effort to packaging and filling orders.

Read the following instructions carefully before filling out the seed request form. PLEASE KEEP YOUR SEED LIST, packets will be marked by number only. Please send the Seed Exchange Request Form (last page of booklet) by mail as soon as possible, but no later than DECEMBER 10. You can request your seeds on-line (see back page) and the complete seed list is available on the website for reference.

Allocation: Donors may receive up to 60 packets and non-donors 30 packets, limit of one packet of each selection. Donors receive preference for seeds in short supply. (USDA will permit no more than 50 packets for those living in the USA.)

List first choices by number only, in strict numerical order, from left to right on the order form. Enter sufficient number of second choices in the spaces below, since we may not be able to provide all your first choices. Please print clearly.

Seeds are garden collected unless marked /W/ = wild collected or /G/W/ = both garden and wild species available. When both are available you may indicate your preference in the space provided or, if you order online, in the 'Add a Note' box at the bottom of the online Order Form. Seeds of plants whose names we are unable to verify are marked with an * on the List.

United States members must include:

- 1) your permit for importation of small amounts of seeds (PPQ Form 587);
- 2) the provided inspection station address label;
- 3) a label with your name and home address; and
- 4) a clearly printed, alphabetical list of your first and second choices.

Leave space on the right side of the page for us to enter the information required by USDA.

New Zealand members: please include a list of seeds requested, as required by MAF.

Thanks to our Seed Donors

Very many thanks to the people who took the time and effort to collect, clean and package the seeds that make our exchange possible, especially in what has been a very unfriendly year, weatherwise, in many parts of the world.
